

Palletization

More functionality than a forklift could carry.

Palletizing can be indispensable for high-volume mailings, but without robust presorting capabilities, its value doesn't stack up. Add power to your pallets with Bell and Howell's Palletization options for BCC Mail Manager.

Many providers offer one or two pallet-presort alternatives. Look to Bell and Howell for total Palletization solutions — support for First-Class Mail® pallets, plus comprehensive Tray-, Package-, and Sack-based Standard Mail® or Periodical sorts. No matter how your pieces are gathered for pallet-based shipments, these products let you handle them with ease — increasing your mailing efficiency, and saving you time and money.

Whether you need only one Palletization option or the complete suite, you'll know your mailings are arranged in an order that maximizes delivery speed, labor economy and transportation ease. Mailpieces even receive less handling, for improved condition when they reach their destination.

Combine pallets with profits. Choose the Palletization options with BCC Mail Manager. Only from Bell and Howell.

Features and Benefits

- First-Class Mail pallet support
- Automate mailing jobs to decrease labor costs
- Centralize your software for multiple user access
- Coordinate marketing efforts in advance with tracking capabilities

- Leverage savings from combined mailings without adding resources
