

TagIt Pro

Tray & Container Label Printing Software

Pick a printer. Any printer.

Looking for a high-performance tag-printing software solution? One that's flexible, with an array of import options? And that works with all Windows-compatible printers or our industry leading TrayMate® 4 tag printer? Done, done, and done.

Introducing BCC Software's TagIt Pro™, the proven container-tag printing resource that's now flexible enough for virtually any mailing system. TagIt Pro prints unlimited quantities of pallet labels and barcoded tray and sack tags for virtually all mail classes. Enter the appropriate ZIP Code™ data for on-demand productivity. Batch printing is a snap, too: just import data from label image, comma-delimited, or Mail.dat files.

Windows-printer compatibility (naturally, it's also optimized for BCC Software's TrayMate printers) means there's no need to buy additional hardware. Just install TagIt Pro and get back to work — with improved efficiency and productivity.

FEATURES & BENEFITS

- » The ideal solution for on-demand container-tag printing, including Intelligent Mail® tray labels and Intelligent Mail container labels
- » Configured for all Windows-compatible printers, including BCC Software TrayMate printers
- » Supports First-Class Mail®, Periodicals, Standard Mail® and Package Service
- » Imports label image, comma delimited or Mail.dat files
- » Intuitive interface enables easy navigation
